

# VOO DOO WILL NOT BE ABOLISHED

## GYMNASTS EVENLY MATCHED AT NAVY MEET SATURDAY

Score Should be Close in Every  
Event of Most Important  
Meet of Season

### TEAM LEFT YESTERDAY

Navy Has World Champion Rope  
Climber—Smashed Record  
Last Saturday

Tomorrow afternoon the Gym Team will engage the Navy gymnasts in what promises to be the stiffest meet for both teams this season. Both teams will be fighting for the championship of the Eastern Inter-collegiate Gymnastic League and it can be felt certain that neither team is going to succumb to the other without a good battle. The Engineers left for Annapolis yesterday afternoon and should thus be able to have a good rest to put them in condition for the meet.

In reviewing the individual chances for the engagement the first event to be noticed is the high bar. In this event Dave Wells stands a good chance of getting first place. With the exception of the Army meet he has won first place in the high bar in every meet this year. He has been practicing his series during the past week and good results may be expected.

### Battle on Side Horse

On the side horse Captain Fairchild and Adamson of Navy should have a keen battle for first place. Both are equally dangerous to the other. Next in order for Technology are Al Moore and Stuart Knapp. Navy also has another good man in Stewart. These three men should put up a stiff fight for third place.

For the parallels Technology has Reynolds and Wells while the Navy has a good man in Cushing. Last  
(Continued on Page 4)

## Quantum Theory Talks Commence

Prof. Heisenberg, Noted German  
Physicist, Will Give  
Nine Lectures

Professor Werner Heisenberg, one of the most famous physicists of the world today, will commence a series of nine lectures at the Institute on "Recent Developments in Quantum Mechanics," the first lecture to be given in Room 4-231 at 4 o'clock this afternoon.

Professor Heisenberg, now only 26 years old, is widely known for his studies along this line, and he is in fact commonly called the inventor of quantum mechanics. In 1926 he discovered the principle of indeterminism, which is to be the subject of his first lecture. Since that time he has done a great deal of pioneer work in almost every branch of quantum theory. At present the professor occupies the post of Director of the Institute of Theoretical Physics at the University of Leipzig.

This series of lectures is in a sense a continuation of a similar series given at the Institute during the winter of 1925-1926 by Professor Max Born of the University of Gottingen, Germany. Professor Heisenberg will discuss the most recent developments in this field, and will explain many of the important discoveries which have been made during the last two years. Perhaps the most interesting of the nine lectures will be one on the recently developed theory of Ferro-Magnetism, and a second on Metallic Conduction. However, all of the talks should prove to be both instructing and absorbing to anyone interested in this field.

The lectures will be held every Monday, Wednesday, and Friday in Room 4-231 at 4 o'clock, and will be open to all students and members of the instructing staff.

Will Speak Today on  
"Our Mineral Virtues"

Dr. Everette L. Degolyer

## Fun and Frolic Will Prevail at Sophomore Dance

Fast Selling of Tickets Insures  
Success of This Year's  
Social Event

Holding their second annual dance the members of the Class of 1931 and their friends will make merry this evening at Longwood Towers. The affair will be held in the Fountain Room and will be appropriately decorated for the occasion. Music for the dance will be furnished by the Tune-sters orchestra which will play from nine until two o'clock with a short intermission at twelve o'clock.

Mr. and Mrs. Horace S. Ford and Mr. and Mrs. Wallace M. Ross will be the chaperones for the affair and are filling the same position that they held last year at the freshman dance at the Copley-Plaza. The committee, which is headed by Horace S. Ford, Jr. '31 has completed all the arrangements and everything is in readiness for the dance.

During the past few days a final drive to sell tickets has been made in the dormitories, fraternities, and in the class rooms. In addition a desk has been maintained in the Main Lobby and anyone who has not yet secured his tickets may do so by purchasing them at that place today. Tickets will be sold there from 9 until 5 o'clock.

Returns for the tickets will be made this afternoon when a meeting of all the members of the committees and others connected with selling tickets will be held in the Faculty Dining Room of Walker Memorial. The tickets have been selling fairly well and the dance committee is confident that the dance will be a success.

## "TECH IN TURKEY" TO STAY ANOTHER YEAR

Judson T. Biehl '27, who is representing Technology at Roberts College in Constantinople, wrote to the T. C. A. stating that he would accept their offer of staying another year as "Tech in Turkey." His salary for the coming year is to be \$1000 which is an increase of \$400 over what he is getting now. This increase was made because he is not going to return to America and he has done such excellent work abroad. The T. C. A. drive this fall secured \$1200 for his support.

At present Biehl is teaching in the department of chemistry and he was asked if he would not like to change to the field of physics, but he said that he did not deem it advisable. In his last letter he told of the severe winter that was endured and how everything was snowed under with the result that there was no mail and food was scarce. Many of the students of Roberts College were delayed in coming to college and were three weeks late.

## ALL MAY HEAR DR. DEGOLYER, ALDRED LECTURER, TODAY

"Our Mineral Virtues" Subject  
of Talk by Prominent  
Geology Expert

### FOURTH LECTURE OF YEAR

Dr. Everette Lee Degolyer, former President of the American Institute of Mining and Metallurgical Engineers, will deliver the fourth of the series of Aldred Lectures this afternoon in Room 10-250 at three o'clock. These addresses ordinarily are open only to Seniors, graduate students, and members of the instructing staff, but because of the widespread interest in the subject President Stratton and Professor Vannevar Bush decided that it would be worth while to have all the students hear the lecture and consequently everyone is invited to attend.

### "Our Mineral Virtues"

The subject of the lecture will be "Our Mineral Virtues." In a letter to Professor Bush, who is in charge of securing the Aldred lectures, Dr. Degolyer said of his lecture: "It is a broad discussion of the position of artificial power in natural economy; of some of the minerals and metals upon which such use of power depends, a consideration of our resources of such metals and minerals; some of my own ideas with regard to our schemes of utilization, and a brief suggestion as to some of the things that will have to be done by the scientists and engineers to secure a continuance of a power civilization."

Dr. Degolyer, who was the first person to apply the torsion balance to scientific prospecting in America, received his B.A. from the University of Oklahoma in 1911. From 1906 till 1909 he was connected with the United States Geological Survey. Since he left this work the lecturer has been active as a geologist and an oil producer. In 1925 he received the honorary degree of Doctor of Science from the Colorado School of Mines.

## PLAN CONFERENCES TO HELP FRESHMEN

As an aid to those freshmen who have not definitely decided what course they wish to take at the Institute, conference hours with the heads of the departments have been arranged for. Freshmen desiring information and advice before making a final course selection may consult the department heads at these hours: from 3 until 5 o'clock on Monday, March 18, and Monday, March 25.

## Students Hold Nocturnal Vigil While Making Boiler Tests at Power Plant

Over Ninety Seniors Make Debut  
as Stokers, Water-Weighers  
and Bell-ringers

Occupying positions ranging from coal-heaver to bell-ringer, over ninety Seniors in the Mechanical Engineering courses completed the annual tests of the boilers in the Technology power house. Under the direction of Professor Jesse J. Eames, these tests began Tuesday afternoon at 1 o'clock and continued until 7 o'clock yesterday morning.

The chief purpose of this annual checking is to determine the weight of water evaporated in the boilers for every pound of coal used. At the same time, samples of flue gas are taken for future analysis, a high percent of carbon dioxide indicating good combustion and fuel depth. The plant's four Babcock and Wilcox boilers are normally fed by Riley under-feed stokers with automatic control of forced draft and stoker engine speed, but for the purpose of the tests fuel was loaded into the two boilers in operation entirely by hand.

All Seniors taking mechanical en-

## Managing Board Forced Out of Office as Penalty For Recent Back Bay Issue

Tell-Tale Toxin Takes  
Terrific Tally Today

"Quick Watson, the needle," is the by-word in the Department of Health this afternoon when those of the unfortunate embryo officers who plan to attend summer R. O. T. C. camp undergo their final ordeal of toxinating. This operation marks the third dosage of the "shots" which, given at one-week intervals, have been a growing source of amusement of co-eds and stenogs who, it is claimed, think the branding of the students inhumane. The men, numbering 223, are lined up in the corridor leading into the first aid room of the infirmary, thoroughly scrubbed or what have you, and left to themselves and thoughts of the demon needle which bites into each alike as they enter the treacherous door.

## Dwight Elected Head of Voo Doo For Coming Year

Institute Committee Does Not  
Recognize Reynolds as  
Business Manager

Robert W. Reynolds '30, was the only member of the new managing board of Voo Doo whose election was not sanctioned by the Institute Committee. He was elected to the position of Business Manager, but as he was Managing Editor of the board that published the "Back Bay Number" he was not allowed to accept this office. Another election for this position will be held shortly.

Charles T. Dwight '30, was elected General Manager and Otis A. Sibley '30, Managing Editor. The other managing board officers are as follows: Art Editor, J. Gordon Carr '29; Advertising Manager, Emilio G. Collado '31; Treasurer, Warren T. Dickinson '31; Circulation Manager, Charles B. P. Hodge '31; and Publicity Manager, Leslie K. Enowdon '31.

Dwight, a Course VI man, prepared at the Bronxville High School Bronxville, New York. While there he was president of the Senior Class, Business Manager of the newspaper, and a member of the gym team. He entered Technology as a freshman and is a member of the Phi Kappa Sigma fraternity.

## HAMLIN, RIEHL, AND FORD INVESTIGATE POLICY OF COMIC

Vote of Students in Dorms and  
Frats Is Considered in  
Final Action

### NEW BOARD FOR VOO DOO

Voo Doo will be allowed to continue as an undergraduate publication at the Institute, the present managing board is requested to resign, and any future compromise with decency by the comic will meet with action by the Institute Committee is the essence of the Investigation Committee recommendation that was adopted at the Institute Committee meeting yesterday.

As a result of the investigation conducted by the committee appointed by the Institute Committee, the following recommendations were made to the Institute Committee: "Resolved, that inasmuch as the holding of a managerial position on an undergraduate activity signifies a deposition of confidence on the part of those affected by that activity, the Institute Committee feels that the action of the Advisory Council on Publications in requesting the resignation of the General Manager, Managing Editor, and Business Manager of Voo Doo as being entirely justified. Resolved, that any future compromises with decency on the part of Voo Doo shall meet with summary action by the Institute Committee." There was no  
(Continued on Page 4)

## Students Hear Dr. Clarence R. Skinner

"Science and Religion" Is Subject  
Of Talk To Liberal Club  
By Minister

"Science never conflicts with religion. It is only in the theological explanations of things and their origin whence science differs," was one of the statements made by Dr. Clarence R. Skinner in his talk before the Liberal Club yesterday on "Science and Religion." According to Dr. Skinner, "Religion is a sense of communion with the universe; of feeling oneself a part and parcel of it all and realizing that he is made of the same stuff as the stars."

A religious life is not necessarily an ethical life, nor can an ethical life be necessarily a religious one. One may enjoy communion with the "Infinite" without obeying every ethical law. Religion is what happens in the solitary places of one's soul and is entirely a personal experience.

An interesting and instructive discussion followed the address and was marked by various personal experiences and opinions. Many important sub-topics under religion were considered. Professor Richard G. Tyler of the Civil Engineering Department presided at the meeting.

## SIGMA CHI BEATEN IN BASKETBALL GAME

Phi Kappa Sigma defeated Sigma Chi in its first game in the Inter-Fraternity Basketball Series. The game was interesting, but lacked the vim and vigor of a Varsity contest. Ryan and Middleton starred for the winners while Morse and Genrich did likewise for the losers. At the end of the first half the score was overwhelmingly in favor of Phi Kappa Sigma. Twelve men were given a chance to play for the winners.

### ANOTHER LIFE FOR "PHOS"

ITS action coming as the conclusion to such intensity of feeling as indifferent Technology seldom sees, the Institute Committee voted last evening to allow "Voo Doo" to continue as an undergraduate activity. Officially the student governing body took its stand when they accepted the report of the committee of investigation of "Voo Doo", as read by Lawrence C. Hamlin '29, its chairman.

Perhaps this vote may be construed to be an expression of acquiescence to the comic magazine's recent policy. There has been some student opinion which did not condemn the "Back Bay Number". But those who have given the matter much thought realize that no organization which has broken faith with the Institute should be allowed to continue. "Voo Doo's" recent issue was a flagrant breach of faith, and the Institute Committee appreciate it full well. However, censorship was out of the question, leaving two courses of action—complete removal of the comic, or severe reprimand. It was a case of no "Voo Doo", or a removal of its offending members.

Again we would approve the course of the Institute Committee in accepting the Advisory Council's recommendation that the men holding the high offices in "Voo Doo" resign. The penalty inflicted on these men is severe, nevertheless, it seems the wisest course in view of the circumstances. To express it mildly, these men, in allowing an issue like the "Back Bay Number" to be published, exhibited poorest taste and showed no forthright nor sense of decency. This accepting of a managerial position on an Institute undergraduate publication is no small responsibility. It is a sacred trust—one's actions reflect directly on the Institute as a whole, and the slightest mis-step makes irretrievable damage. This lesson which has been applied to "Voo Doo" is not limited—it must be appreciated fully by all those holding positions in student activities, however small they may be.

The Institute Committee was called upon to handle a matter as grave as anything in recent years. Their prompt action again proved that we students are capable and eager to settle our own troubles. The satisfactory disposal of the matter is a distinct credit to student government here. It is our sincere hope that the unfortunate occurrence is never duplicated.

The Institute Committee's action is a vote of confidence in the newly elected managing board of "Voo Doo". These new men should have learned their lesson—they appreciate full well that summary action will follow the recurrence of any such breach of trust as has recently been witnessed. They have a large task before them, and we wish them well.

### PROMOTIONS AND ELECTIONS

THE TECH, Volume XLIX, takes pleasure in announcing the following promotions and elections to the Associate Board and the staff:

Features Editor: Edward B. Hubbard '31.

News Writer: Otto W. Burtner '31.

Photographic Staff: Philippe H. Bonnet '31; John P. Elting '31.

Reporters: Robert McKenzie '32; Otto Charles Chapman '31; Miller E. McConnell '33.

Circulation Staff: Lorenzo Cianciolo '32; J. J. Winkler '32.

Advertising Staff: George E. Nealand '32; Thomas E. Sears, Jr. '32.

### The Open Forum

To the Editor of THE TECH:

If a freshman may be allowed to express his opinion, I should like to say that it seems to me that the "Course X Junior" whose letter appeared in Monday's issue of THE TECH is really taking too many things for granted; he assumes in the first place that THE TECH has a burning desire to suppress "Voo Doo", and in the second place, that the Institute Committee is similarly biased, both of which seem a little absurd. On the contrary it seems to me that

THE TECH would have been deserving of criticism had it failed to express what is undoubtedly the opinions of a large number of Tech undergraduates regarding "Voo Doo's" latest.

I don't believe any advantage could be gained from "suppressing" "Voo Doo," for "Phos" seems to have learned its lesson, and on the whole, "Voo Doo" compares favorably enough with other college comics. But the Back Bay Number was certainly deserving of all criticism which it received. After all, whether it seriously offended the "Course X Juniors" moral sense or not, it certainly was not calculated to create a very favorable impression of Technology among outsiders.

Very truly yours,  
Frederick R. Henderson '32

### As We Like It

To these who enjoyed Ed Wynn in "The Perfect Fool", it is enough to say that he is again in Boston; the production in which he is playing is of minor importance. This time, however, it is not hard to praise the whole show. Musical comedies seem to be on the upgrade.

The newest one is "Manhattan Mary", playing at the Shubert Theatre, staged by George White, and comes here from a long run at George White's Apollo Theatre in New York. The plot is of the usual musical comedy type, but it incorporates many new ideas that lend variety as well as laughs. A girl from Greenwich Village, because her mother is in sad straits, joins George White's "Scandals". She is in love with a man who plays in a night club orchestra, and he objects to her employment. There is a fight and a separation, Manhattan Mary becomes the star of the "Scandals", and receives an offer to play in the "Folies Bergere" in Paris. After a successful season, she returns to New York, and is welcomed by Mayor Walker. A reconciliation follows and thus the show ends.

But Ed Wynn comes in for his part too. He is the waiter in Mary's mother's restaurant, and he finds a chance to look and act as dumb as only Ed Wynn can. He has only to say a word or two and the whole audience passes into fits of hysteria. He also has the opportunity to show that he can dance.

The production might well be praised for its originality. There are scenes backstage at George White's Apollo Theatre at rehearsal time, directing scenes, and several gorgeous scenes representing the program of the "Folies Bergere" in Paris. There

### As We See the Movies

#### THE FENWAY

With the familiar strains of the well-beloved old lyric furnishing a fitting theme, the Fenway's feature picture, "Mother Machree" comes as a pleasant contrast to the ordinary run of movies. Full of Irish wit and humor, with a few tears in the bargain, the picture has a good plot, and is well acted throughout.

It is a real Ireland in which the story opens, with stubby clay pipes, colleens, shamrocks and fights all thrown in to give atmosphere. When "Mother Machree," the role taken by Belle Bennett, loses her husband at sea, she takes her young son to America. Philip de Lacey, who plays "Brian," the lad, is a beautiful boy, and his charm brings him to an elite private school. At his request, his mother relinquishes her claim that he may enjoy the privileges she desires for him. She is left, heartbroken, a stranger in a strange land.

As the nurse and companion in a wealthy family we next see "Mother

is a large chorus of girls that might well be called "glorified", and also a ballet group that lends an air of distinction to the dancing. The comedy would be well worth seeing even without Ed Wynn, and with him, it becomes exceptionally so.

#### ENJOY THE SPRING SOCIAL SEASON

Machree." She has brought up the young daughter, and been made her confidante. As a result of the incongruousness of movie plots, the son Brian, now a handsome man (played by Neil Hamilton) comes to the house, much in love with the daughter. More complicated situation, for the proud mother does not wish to reveal her identity to her son. War is announced, and Brian leads his friends to enlist. Tears, laughter and love mingle when Brian, his mother and his fiancée part. But he returns, safe and sound, and they all "live happily ever after."

The "Darkdown" characters made famous by Octavius Roy Cohen make a very good comedy skit, an "All-Talkie" produced by Paramount. The news reel, featuring the recent inauguration of President Hoover has real humor provided by some of Mr. Hoover's home townfolks from West Branch, Iowa.

Vitaphone, feature and news, the whole evening is good entertainment.

The Mayor of Chapel Hill, N. C. was opposed to the boys of the University of North Carolina standing in the streets while asking for rides from passing motorists. He passed a law stating that the boys would have to stand on the curb while bumming. The first day this law was in effect about fifteen boys hitchhiked while standing in the streets, and suffered the penalty of three dollars each.

"OUR PIONEERING WORK HAS JUST BEGUN"

# SWIMMERS ENTER NEW ENGLANDS

## Every Record Should Be Broken in New England Swimming Meet Tomorrow

### ENGINEERS STAND SECOND TO BROWN ALONE IN LEAGUE

Trial Heats Will be Held this Evening at University Club Pool

#### FINALS ARE TOMORROW

Tonight for the first time the New England Intercollegiate Swimming Championships will be held in Boston at the University Club pool under the auspices of M.I.T. Nine teams will be represented, and the powerful Technology team is expected to finish well up in the running.

The heats for the different events will be held this evening at seven o'clock and the finals will be run off tomorrow afternoon at two.

This season's swimming team is the most powerful and well-balanced that the Institute has had for ten years, having repeatedly broken Technology records, and at present holding two New England records. Captain Larry Luey now holds the New England record in the hundred and fifty yard back stroke, while his team mate Ed Mackay is the present holder of the best three-hundred-yard medley time, having cut the time for that event by ten seconds. Twelve Technology re-

cords have been broken by the present Varsity team.

#### Fast Teams Entered

Some of the best swimmers in the East will be found at the contest this year and every standing record is expected to go by the board. The fastest teams to be entered are Brown, Amherst, Worcester Polytech, and Bowdoin.

Brown has the best team that is entered, having lost only to Yale and Princeton. Technology is listed as the second strongest team. They have been showing better form daily however at practice and undoubtedly will furnish more than one upset tonight and tomorrow.

There were 929 women medical students in the United States last year.

The largest university in this country is Columbia with 35,000 students and 1,500 teachers. The smallest is Buena Vista with 21 students and a faculty of only 16.

Texas University has at last filled a long felt need in the modern campus curriculum, for it now has a class that meets with the open purpose of spending its hour in sleep.

## M.I.T. BOXERS WILL MEET DARTMOUTH

Final Dual Meet of Season Will Be Held Tomorrow With Regular Lineup

Tomorrow night in the Hangar Gym, the Engineer boxers will have their last meet this season with the powerful Dartmouth team before the Intercollegiate, which will be held this year at Pennsylvania State College. Having fought with a crippled team in the last two meets, all of the first string Engineers, except Horton, will go in the ring tomorrow for Technology.

Orleman, who has been in the Infirmary, is out again, and hopes to

## Spring Practice For Soccer Team Begins on Monday

Season of Five Week's Duration Includes Matches With Amateur Clubs

Spring practice for the Soccer Team will begin on Monday, in preparation for a short schedule which will follow very soon. Coach Welch has demonstrated his interest in the sport by offering his service free of charge, and the team will not suffer for lack of proper instruction.

The spring season will last from April 6 to May 11, during which time matches will be played with amateur teams in the vicinity of Boston, most of which will take place on the field in the rear of the Coop. A series is contemplated with Harvard, to be played before the end of next week. One game will be played at Harvard and one at M.I.T., with the rubber to be decided upon if need occurs.

#### First Practice Monday

All men who intend to compete for positions on the team will report at the Hangar gym on Monday at five o'clock, in order that regular outdoor practice may start on Tuesday with no delay. Three weeks remain in which to build up a team that will be capable of representing the Institute in the first game, and this should not be difficult in view of the available playing material, consisting of men from last year's freshman and Varsity squads. The prospects for a well-balanced team are very bright at this time.

Men who have never been out for the Soccer Team in the past are also encouraged to take advantage of this form of exercise and recreation. As an added inducement there is a motion before the Advisory Council to allow soccer to be substituted for the dreaded Monkey Drill.

#### Jim Alexander to be Back in Three Weeks

Doc Johnson and Oscar Hedlund have been down recently to see Jim Alexander, popular caretaker of the track house and report that he should be back on the job in about three more weeks. He has been out for over a month now in the hospital for an operation for appendicitis. He has been missed around the track house considerably if the exclamations that greeted the news of his coming return are anything to judge by.

# He coughed ..the Villain!

## NOTICES and ANNOUNCEMENTS Of General Interest

**Aldred Lecture** **Dr. E. Degolyer**  
Friday, March 15, 3 P.M., Room 10-250

Dr. E. Degolyer, former president of the American Institute of Mining and Metallurgical Engineers, will be the speaker for the fourth lecture in the Aldred Series. The subject of the lecture will be "Our Mineral Virtues."

The lecture is open to seniors, graduates and members of the instructing staff.

**Quantum Mechanics** **Prof. W. Heisenberg**  
Friday, March 15, 4 P.M., Room 4-231

Professor W. Heisenberg, Director of the Institute of Theoretical Physics of the University of Leipzig, will deliver nine lectures on "Recent Developments in Quantum Mechanics." The first lecture will be on the subject "The Principle of Indetermination."

The lecture is open to students and members of instructing staff.

## Calendar

- Friday, March 15**  
3:00—Aldred Lecture by Dr. E. L. Degolyer on "Our Mineral Virtues", Room 10-250.  
3:00—A. I. E. E. Meeting, Room 10-275.  
3:00-10:00—Basketball Tournament, Hangar Gym.  
4:00—First of Series of Lectures by Professor Werner Heisenberg on "Recent Developments in Quantum Mechanics", Room 4-231.

**CATHOLIC CLUB**  
Members of the Technology Club will receive Holy Communion at the 9 o'clock Mass at the Cathedral. A Communion breakfast will be held at the Hotel Lenox at 10:30. All members are requested to be present.

## 8395 Decisions Favoring This Smoke

Ipswich, S. D.  
Sept. 4, 1928

Larus & Brother Co.,  
Richmond, Va.

Gentlemen:

In answer to the challenge of J. J. Roberts of Columbia, S. D., as printed in the Minneapolis Journal dated Sunday, September 2nd, I have smoked Edgeworth for twenty-three (23) years and for two years previous to that time I smoked Qboid, which, I believe, is manufactured by your firm.

During this time I have smoked at least one can each day, and to verify this statement you may address the C & C Cafe of this city, where I make my tobacco purchases.

It may be interesting to know that my purchases of Edgeworth during this period have totaled more than 8395 (eight thousand three hundred ninety-five) cans, representing a total expenditure of more than \$1259 (twelve hundred fifty-nine dollars).

I have never smoked any other brand of tobacco but Edgeworth during the twenty-three years.

Yours very truly,  
(Signed) Chas. Bostock  
Justice of the Peace

**SENIOR RINGS**  
Rings for the class of 1929 can be secured Monday from 9 to 12 o'clock in the Main Lobby. On receipt of the ring those who ordered them will pay the remainder of the cost.

**FENCING SEMI-FINALS**  
The New England section of the Intercollegiate Fencing Tournament Semi-final will be held at the Boston Athletic Club on Exeter Street, Saturday, March 16. The foil tournament will be in the afternoon, and the sword and sabre tournament in the evening.

**SENIORS**  
A representative of the W. T. Grant Company will be here on Monday, March 18, to interview seniors who are interested in Chain Store work.

Any students who desire to meet this representative should schedule an appointment in Room 3-212 at once.

## New Board Chosen For Comic Monthly

**Institute Organizations Vote In  
Favor Of Continuation Of  
Comic Monthly**

(Continued from Page 1)

discussion and the recommendations were unanimously adopted.

At the Institute Committee meeting of February 28, the Executive Committee of the Institute Committee recommended to that committee that it go on record as disapproving of the February 1929 number of Voo Doo and that the President of the Institute Committee be empowered to appoint a committee to investigate Voo Doo's policy and the advisability of allowing Voo Doo to continue as an official undergraduate Publication of Technology.

As a result of this recommendation a committee was appointed consisting of Lawrence C. Hamlin '29, chairman, Theodore A. Riehl '30 and Horce S. Ford, Jr. '31. The investigation was conducted on a basis of three points; to discover the cause or motive resulting in the publication of the February 1929 number of Voo Doo; to determine the advisability of allowing Voo Doo to continue as an official undergraduate publication; and to discover the factors affecting the prevention of a similar number of Voo Doo in the future.

Various methods of investigation of the problem were used by the committee. A meeting was held with the Managing Board of Voo Doo to discover the cause of the February issue and the policies and plans underlying past and future activities. The chief cause of the Back Bay number seemed to be one of increasing the circulation of Voo Doo for a month which in previous years had been quite low. Other reasons seemed to be a desire to put out a more spectacular issue and the effect of the general trend of college comics.

By circulating the following question among the fraternities and dormitories an attempt was made to determine the undergraduate opinion on whether or not Voo Doo warranted a place in Technology: "In your opinion does Voo Doo, in view of all the issues you have seen, justify its continuance as an official undergraduate publication of M.I.T.?" The ballot showed 205 in favor of continuing Voo Doo and 47 in favor of abolishing the comic.

At the joint meeting held with the Advisory Council on Publications, the Advisory Council explained its status in connection with Voo Doo as consisting of acting entirely as an advisory body and as having absolutely no relationship in the way of censorship. As to the literary content of Voo Doo the Advisory Council said that there had been small difficulties previously but nothing serious had happened.

In connection with the February number of Voo Doo the Council met on March 1 and decided in view of an obvious misplacement of trust and a further lack of confidence in the acting senior board to send a letter to Voo Doo requesting the immediate resignation of the senior board and asking for the appointment of a new board in which it could place confidence.

With respect to the problem of the investigating committee the Advisory Council was of the opinion that although Voo Doo's policies at present were entirely unsatisfactory an opportunity should be allowed for Voo Doo to correct these undesirable features. It was felt that the literary content of Voo Doo had deteriorated during the last few years.

After the Institute Committee had voted to accept the recommendations of the Investigation Committee, Jerome B. Geisman '29 submitted the list of the new members of the Voo Doo managing board for approval. Geisman explained that although Robert W. Reynolds '30, who was nominated for Business Manager, had been on the board that been requested to resign, he was in way responsible for the Back Bay issue as he had actively objected to passing on the copy.

Most of the Institute Committee members seem to feel that in view of the fact that they had approved the recommendations of the Investigation

## For College Parties

## GYM TEAM AT NAVY FOR IMPORTANT MEET

**Both Teams Training Hard For  
Crucial Match Of Season**

(Continued from Page 1)

week he was defeated by two Dartmouth men, but the impression should not be gained from this that he is not a dangerous man. Either Reynolds or Wells may get the honors for Technology for both men are good enough to make it a case of a toss-up.

## Reynolds and Wells Again

Reynolds and Wells are again among those booked for the best Technology has on the rings. With them comes Couper and among these three men the Engineers should be able to get two or more places in the event. In the tumbling, Technology's outstanding star is Dolloff. He worked out extremely well last Saturday against Temple and Bowdoin, and if he does the same tomorrow, should come through with a first place. Palmer seems to be the only Navy man to threaten him at all.

The rope climb looks as though it will be a different story. Galbraith of Navy set a world's record in this event last Saturday in the meet against Dartmouth. He did it in 42.5 seconds. McElroy, the Navy second place man, took second in the same meet with 5 seconds flat. This is equal to the best time that Fairchild, Technology's first place man, has made this season. Thus it would seem that the best the Engineers can hope for in this event is second or third place. Reynolds, Couper, and Knapp are also entered in this event.

On the whole the Engineers and Midshipmen are meeting on fairly equal terms and the outcome of the meet can not even be guessed with any degree of accuracy. If working hard will win the meet the Engineers should win, for they have been practicing faithfully for the past week brushing up on their weak points and adding things to their series. The team is not confident of winning but they are confident of giving a good fight to the Navy team, win or lose.

tion Committee which provided for an entire new board, they could not approve the appointment of Reynolds. The Institute Committee finally voted that the elections be accepted without Reynolds as Business Manager.

## ANNOUNCE LIST OF SENIOR COMMITTEES

**Member of Class of 1930 Elected  
to Executive Committee**

At the meeting of the Executive Committee of the Senior Week Committee held last Monday, the following committees were appointed: Pop Concert—Virgil M. McDaniel, chairman, Lawrence D. Luey; Banquet—Ralph Vezin, chairman, Hugh Hamilton, Elmer A. Skonberg; Picnic—Lewis R. Aldrich, chairman, Vernon E. Ware, Rolf A. Zurwelle, Albert L. Eigenbrot; From—Eric A. Bianchi, chairman, Amasa G. Smith, Oswald V. Karas; Baccalaureate—Ralph B. Atkinson, chairman, Class Day—Lawrence C. Hamlin, chairman, M. Richard Boyer, Gordon F. Rogers; Tea Dance—John B. Osborn, chairman, Charles W. Denny, Edward Tittman; Publicity—Earl W. Glen, chairman, John T. Hallahan, David F. Bremner, Bernard B. Brockleman; Booklet—Howard L. Aldrich, chairman, Glen N. Andrews.

Edmund G. Blake '30 was selected as the member-at-large from the class of 1930 on the Executive Committee. The custom of electing a Junior member to the Executive Committee was begun last year in order to give the Junior Class the benefit of the experience of the previous graduating class. Earl W. Glen '29 was the Junior member last year.

## BOXERS ARE PREPARED TO MEET DARTMOUTH

With No Casualty List**

(Continued from Page 3)

mouth mittman. He has been working hard, and seems to be none the worse for his absence from previous meets.

Captain Bolanos, still undefeated, is a decided favorite to win his bout, and hopes to complete an undefeated season tomorrow night. After the Dartmouth meet, he will go into intensive training for the Intercollegiate which he hopes to win this year.

## Jameson Will Fight

Jameson, probably the most spectacular fighter on the team, will go in the ring for the first time in a month. Due to a sore hand, he has been considerably handicapped in practice, but expects to score a victory over the Green mittman. In the 155 pound class, Englar will enter for the Engineers. He has not won a meet so far this year, but he will give his opponent a hard bout, as he has shown much improvement since the last meet.

Horton, the 175 pound Varsity boxer, will not go in the ring, due to a sore nose. In the last meet with New Hampshire, Horton was injured by a punch to the face, which dislocated the cartilage in his nose, forcing him to forfeit the 175 pound bout to the Dartmouth man. The unlimited bout will also be forfeited to the Green team.

Extensive preparations have been made at the University of Oregon for the filming of a motion picture, released by a students company to be cast in a few weeks.
